❖ Overview:-

Of the indisputable facts, the active role played by training in the solution of many problems facing organizations and workers in various levels. It is also indisputable that the training does not play this role effectively and efficiently except if scientifically planned and deliberate.

The planning and organization of training begins in identifying the training needs and ends with Strong implementation the level of scientific and thoughtful can be said that the return on training is the most important step for the rehabilitation of human resources.

QMC has sought to quality in the implementation of training programs and considers the following:-

1. Provide participants with information and new contents, which contribute to increase the growth of knowledge.
2. Provide participants with strategies and training skills to help them in planning and creativity.
3. Provide participants with the trends and positive values that would help them increase their willingness to work and professional behavior will change for the better, thus contributing to the achievement of educational objectives, and access to the degree of love of work and institutional affiliation.
4. Care in the preparation of scientific material can be integrated back after the end of the program.

5. Diligence to selection of trainers with high efficiency to support the training process.
6. Distinct method of training depends on the exercises and practical applications with a minimum of 40% of the total hours of training and implementation of programs to stimulate and keep up with the real evolution.
7. Design all training programs with objectives to develop more productive by providing scientific material that would develop the relevant skills which can be applied to keep the wheel of progress.
8. We evaluate the participant and after the implementation of the program to measure the outcome from the training and we provide report showing the extent to which the participant performance from the program and what are the training requirement of the future.
